

why window film?

Blocks up to 80% total solar energy, significantly reducing demand on HVAC system

Reducing 90% glare and 99% UV improves a room's comfort while protecting its occupants and furnishings

WERS For Film energy ratings allow accurate comparisons of the energy benefits of different films

Low E film can reduce up to half the heat gain in Summer and half the heat loss in Winter

Electricity bills are slashed. In most cases window film pays for itself in five years

Safety and security films help prevent break-ins and mitigate the risk of injury and damage from broken glass

wfaanz
WINDOW FILM ASSOCIATION
OF AUSTRALIA AND NEW ZEALAND

Members of WFAANZ are professional window film installers who abide by a strict code of practice. For advice on which window film best suits your energy needs, visit wfaanz.org.au for a list of local WFAANZ members.
