

# Why choose a WERS For Film accredited installer?

- ▶ Would you use a builder who wasn't licensed, or get in a taxi if the driver's licence wasn't visible? The same principle applies here - a WERS For Film licence is your assurance of quality. Verify accreditation at [www.wfaanz.org.au/WERSLicensees](http://www.wfaanz.org.au/WERSLicensees)
- ▶ Your windows are worth thousands of dollars - using an accredited installer protects your investment
- ▶ WERS For Film is the only accreditation program in Australia for film installers - it separates the wannabe's from the professionals
- ▶ Accredited installers have the **exclusive** authority to issue energy certificates, which are used by assessors when rating your home's efficiency and can help boost the sale price of your home
- ▶ The government doesn't require energy rating disclosure when you sell your home now - but it will soon. Without an energy certificate you can't benefit from energy rating credits for the film
- ▶ Rigorous training and testing through the Australian Fenestration Training Institute is a requirement of accreditation
- ▶ Accredited installers are taught how to recommend the most suitable WERS rated film for your specific needs
- ▶ Technical updates ensure they remain 'in the know' when it comes to assigning best practice solutions to your window problems
