

# Special WFAANZ member offer

# Energy audit

The rising cost of energy is one of many skyrocketing business expenses that Aussie and New Zealand window film installers are forced to contend with. In response, WFAANZ partnered with Choice Energy to help its members reduce energy costs and improve operational efficiency.

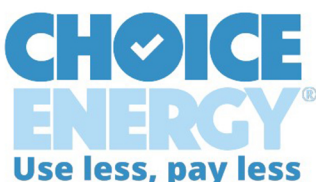

Australian owned and operated, energy consultancy Choice Energy has helped 620 businesses identify and save over \$4,000,000 on their energy spend since July 2023.

How the WFAANZ partnership works...

WFAANZ members contact Choice Energy for a free 'energy audit' that pinpoints if and where energy savings can be made. At the end of the day, you'll get one of two things:

**1** A Choice Energy report that clearly explains ways your business can improve its energy procurement model, or

**2** Peace-of-mind, knowing that not even a team of energy geeks could find a way to reduce your energy spend.
